Tenom, Sabah.

Experiences

External Netball Trainer (5 Months)

- Conducted netball training sessions.
- Guided participants in improving skills and teamwork.

Cashier | Restaurant (2 Months)

- Handled customer payments and transactions.
- Provided customer service and support.

Skills

- Network Security
- Cybersecurity Fundamentals
- Wireshark
- Linux (Kali Linux)
- Cisco Networking
- Network Simulation (NS-3)
- Intrusion Detection System (IDS)
- Python
- Penetration Testing
- Burp suite

Language

Malay - 100%

English - 95%

About me

Final-year Computer Science student at Universiti Sultan Zainal Abidin (UniSZA), majoring in Computer Network Security. Passionate about wireless network security, intrusion detection systems (IDS), and network simulation. Experienced in developing and evaluating network security solutions using NS-3, with a focus on IP/MAC filtering, attack detection, and network performance analysis. Seeking opportunities to apply technical skills in cybersecurity and network security environments.

Education

Bachelor of Computer Science (Computer Network Security) with Honours

Universiti Sultan Zainal Abidin | 2023-2027

- Specializing in network infrastructure, cryptography, and cybersecurity
- CGPA 3.49

Sijil Tinggi Persekolahan Malaysia (STPM)

SMK KEMABONG TENOM | 2021-2023

- academic background in Sports Science, Business Studies, and General Studies.
- CGPA 2.93

Achievements

- Assistant Student Representative Council (MPP Assistant), Form 6
- Pengerusi Club Bola jaring (Form 6)
- Pengerusi Kadet Polis (Form 6)
- Exco Keusahawanan, Persatuan Kebudayaan Anak-Anak Borneo

Academic Projects

- Final Year Project: Enhancing Wireless Network Security through IP/MAC Filtering and IDS
- Designed and simulated a wireless network security solution using NS-3.
- Implemented IP/MAC filtering and IDS mechanisms to detect malicious traffic and unauthorized access.
- Analyzed network performance under UDP flooding attacks using throughput, PDR, packet loss, and delay metrics.
